SUMMARY

Software Engineering student at FAST-NUCES with 2+ years of experience in full-stack development, software design, and quality assurance. Proficient in Java, Spring Boot, Python, MERN, and SQL. Applied AI/ML for preprocessing and predictive modeling. Focused on building efficient, reliable, and high-quality software solutions.

EDUCATION

FAST National University of Computer & Emerging Sciences, Lahore *Aug '23 – Jun '27*
Bachelor of Science in Software Engineering | CGPA: 3.42

- Dean's List: Jun '26, Jan '26, Jan '25

Garrison College for Girls, Lahore *Oct '21 – Aug '23*
Intermediate in Computer Science | 91%

Army Public School, Azam Garrison, Lahore *Apr '19 – Aug '21*
Matriculation, Science Group | 97%

EXPERIENCE

Cybersecurity Outreach Ambassador — AQSEC *Jan '26 – Ongoing*
Cybersecurity Training Organization

- Hosted online cybersecurity outreach programmes and technical workshops, including tech talks and Capture the Flag sessions, engaging 100+ students.

Software Development Intern — BIG O SOFT LLC *Jul '26 – Aug '26*
IT Services and IT Consulting

- Developed scalable real-world web applications using Next.js and the MERN stack.
- Implemented AI-driven features to solve real-world user problems.

Teaching Assistant – Database *Jan '26 – Jun '26*
FAST-NUCES, Lahore — HEC-Recognized University

- Mentored and evaluated 140+ students in database design, SQL querying, relational modeling, normalization, transactions, and database management using SQL Server, MySQL, and PostgreSQL.

Lab Demonstrator – Computer Organization & Assembly Language (COAL) *Aug '25 – Jan '26*
FAST-NUCES, Lahore

- Conducted 50+ hands-on lab sessions for 80 students on 8086 Assembly language, microprocessor architecture, and computer organization concepts.

Teaching Assistant – Design & Analysis of Algorithms *Aug '26 – Jan '27*
FAST-NUCES, Lahore

- Mentored 40+ students in algorithm design and analysis, covering greedy algorithms, dynamic programming, divide-and-conquer, graph algorithms, and complexity analysis using Java and C++.

Teaching Assistant – Computer Networks *Aug '26 – Jan '27*
FAST-NUCES, Lahore

- Guided 100+ students through networking labs covering Python socket programming, OSI/TCP-IP models, network protocols, packet analysis, and client-server communication.

SKILLS

Languages: JavaScript, Java, C++, Python, HTML, CSS, C, SQL, NumPy, Pandas, .NET
Frameworks: Spring Boot, Node.js, React, MERN Stack
Tools: Git & GitHub, Postman, JIRA, Matlab, Zoom, ZAP, Burp Suite, Canva, Microsoft Office

PROJECTS

Nocturne Library – MERN Stack Reading Nook *Apr '26*
HTML, CSS, JavaScript, React.js, Node.js, MongoDB

- Developed a full-stack MERN application with 9+ features, including a digital library, reading timer, mood-tagging system with 8 categories, and a social networking layer.

Dyslexia Detection System – AI-Based Dyslexia Analysis Web App *Apr '26*
Python, ResNet, AI/ML

- Built an AI-based dyslexia detection web application using ResNet and CNN, achieving 93% accuracy in handwritten sample analysis, with secure login and report generation.

CookieWise – Automatic Cookie Banner Detector *Mar '26*
JavaScript, Chrome Extension, Selenium

- Built a Chrome extension for cookie banner detection using DOM monitoring and keyword heuristics, with Selenium automation to handle consent dialogs and apply personalized settings across websites.

LogiSim – Digital Logic Circuit Simulator *Jan '26*
Java, Java Swing

- Developed a Java-based digital logic simulation tool with an interactive drag-and-drop interface supporting multiple logic gates, automated truth table generation, and Boolean expression evaluation.

ResQ – Disaster Relief Camp Management System *Apr '25*
Java, Spring Boot, PostgreSQL

- Developed a disaster relief management system with role-based access for admins, volunteers, donors, and victims, featuring resource allocation, donation tracking, 5 km radius task mapping, and real-time relief operation management.
